DID IT PRINT IN THE RIGHT SCALE?

To check if the converter has been printed correctly, measure the scale above with a ruler to confirm that it is 50 mm.

Note: Currently the sizes of the sample shoes differ from those of the Size Converter. This is due to the adjustment of the fits for the newer models. The sizes determined by the converter are the valid sizes.

HOW TO FIND THE RIGHT FIT

Never measure your feet in the morning; feet tend to swell during the day due to heat and activity. For the best fit, measure your feet at the end of the day.

EU	Length (heel to toe)	Width
36	23,1 cm	7,9 cm
37	23,9 cm	8,1 cm
38	24,5 cm	8,3 cm
39	25,1 cm	8,4 cm
40	25,7 cm	8,6 cm
41	27,0 cm	8,5 cm
42	27,8 cm	8,7 cm
43	28,6 cm	8,8 cm
44	29,1 cm	9,0 cm
45	29,8 cm	9,1 cm
46	30,8 cm	9,3 cm
47	31,1 cm	9,4 cm
48	31,7 cm	9,6 cm
49	32,3 cm	9,7 cm
50	32,6 cm	9,8 cm

Follow these instructions:

LENGTH FROM HEEL TO TOE

Place a sheet of paper on the floor with one end touching the wall. Stand on the paper with your heels facing the wall. Mark the place where your toes end with a pencil.

Measure from the end of the paper to the mark you just made and compare the number to our size chart. Take the size which is 1 - 1,5 cm bigger than your „heel-to-toe-length".

CHOOSE THE RIGHT SIZE

This is easier said than done. Because what if you're in between sizes? In that case, it's safest to measure your feet and take the size which is 1 - 1,5 cm bigger than your „heel-to-toe-length".
